

# VISIANO 20 LED EXAMINATION LIGHT

---

The VISIANO 20 is an examination luminaire with first-class performance and innovative features. At 60 000 lux at 0.5 m, the light field is outstanding for the class. This makes it suitable for many applications: general medicine, dermatology, gynecology, urology, neonatology and anesthesia. In intensive care, emergency and surgery preparation, it assists medical personnel with high quality illumination using LEDs in two different light colors. Unique in this luminaire category is the integrated Sanitized® hygiene function.

## SPECIFICATIONS

- An examination luminaire with first-class performance and innovative features
- Luminous power: 60,000 lux at 0.5m
- Usage: Keypad on luminaire head
- LED technology
- Illuminated field 210 mm
- Precise colour rendering Ra >95, R9 >90
- Colour temperatures (3500K and 4500K) allow individual contrast viewing
- Illumination strength dimmable in 4 stages
- Highest light quality due to diamond optics
- Antimicrobial hygiene function on important lamp components - integrated antimicrobial Sanitized hygiene function in the upper luminaire housing helps to keep critical areas hygienic
- Easy operating unit on head
- Maximum operating radius (head can be rotated about 360°)
- Excellent ergonomics due to spring-balanced aluminium arm system
- Minimum maintenance costs due to LED technology
- Slight thermal radiation in light (reduced drying of tissue)
- Mounting options - ceiling, wall or roller stand - completely enclosed housing prevents dirt from entering and settling
- Complies with the requirements of standards EN 60601-1 and EN 60601-2-41
