

HALUX N50 LED EXAMINATION

HALUX N50 is the right luminaire for anyone looking for good lighting quality at a top price. The illuminance of up to 50,000 lux at 0.5 m and the 18 cm light field ensure optimum examination conditions. The neutral white light with very good colour rendition properties facilitates diagnosis. Illuminance can be dimmed in five levels. The arm system also leaves nothing to be desired. Depending on requirements, the luminaire is available with a robust flexible arm or a positionally stable spring arm. Thanks to its closed design, HALUX N50 is easy to clean.

The premium version HALUX N50 convinces with its minimalist form and the typical Swiss attention to detail. It is the perfect luminaire for anyone who wants more light output or colour-changing light. Can be used in all areas of human and veterinary medicine. Ideal for very fine minor surgical procedures such as eye-lid examination and many other procedures.
