OPTICLUX 10 WALL MAGNIFIER LIGHT

OPTICLUX 10 magnifier Light combine a robust magnifying glass with outstanding light quality and ergonomic operation. As a proven medical device, they can be versatily used in dermatology, clinics and practices for dental, human and veterinary purposes, in laboratories and in the monitoring of sterilization goods.

OPTICLUX has everything a modern magnifier luminaire is meant to have: a robust magnifier with 1.9x magnification, the latest LED modules, ergonomically tested arm joints and intuitive operation. OPTICLUX's biggest plus is its daylight-quality light field, its outstanding color rendering properties and its maintenance-free life cycle. As an approved medical device, it can be versatily used in dermatology, human medicine, dentistry and veterinary medicine, in laboratories and for monitoring sterilized products.
